

Review Report

Please present your comments according to the following guideline:

1. Summary

(You are invited to summarize the paper succinctly and dispassionately.)

2. General comments

(This is the place to keep your perspective, and explain what the paper's weaknesses are and whether they are serious, or intrinsic to our current state of knowledge, or whatever.)

3. Constructive criticism

(It includes not only technical issues, but also organization and clarity.)

4. You can also comment this paper by using track changes in the manuscript.

The paper should be **A.** "published as is", **B.** "published after corrections have been made", **C.** "rejected".)

Please grade this paper:

Criteria	Score (1-10 points)
Novelty	6
Originality	4
Technical Strength	7
Language Performance	5
